EDUCATION

Lovely Professional University Aug 2024 – Present
Bachelor of Technology; Computer Science and Engineering; CGPA – 7.32

MG English International School Mar 2023 – Mar 2024
Intermediate – 70%

MG English International School Mar 2021 – Mar 2022
Matriculation – 80%

SKILLS

Languages: Python, JavaScript, TypeScript, C, C++, SQL, HTML/CSS
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs, WebSockets, Electron
Libraries: TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Supabase
Tools: Git, GitHub, Linux, VS Code
Soft Skills: Problem-solving, Team Collaboration, Adaptability, Continuous Learning

EXPERIENCE

Web Development Intern — CodeValues Pvt. Limited Aug 2026 – Present

- Developing and maintaining responsive web application features using modern front-end and back-end technologies as part of the development team.
- Collaborating on REST API integration and database interactions to support core application functionality.
- Participating in code reviews, debugging, and version control practices to ensure clean, maintainable code delivery.

PROJECTS

Four-Layer Secure Authentication System Apr 2026
Technologies: Python, OpenCV, Face Recognition, Flask, Email/OTP API

- Designed a four-factor authentication system (password, email OTP, hand-gesture verification, and facial recognition) so that a single compromised factor alone cannot grant access.
- Used computer vision to verify a user-specific hand gesture in real time, followed by facial recognition for final identity confirmation.
- Added login-environment change detection (new device/network) that forces re-authentication instead of automatically trusting the existing session.

ResumeIQ AI Jul 2026
Technologies: Next.js, React, TypeScript, Supabase, Gemini API, Tailwind CSS

- Built a full-stack SaaS platform to analyze PDF/DOCX resumes and generate AI-powered ATS scores.
- Integrated Gemini API with custom prompt engineering for resume analysis and personalized recommendations.
- Implemented Supabase authentication, server-side sessions, and Razorpay subscription billing.

InternPilot — AI-Powered Internship Agent Aug 2026
Technologies: LLMs, TypeScript, Gemini API, Next.js

- Built an autonomous AI internship assistant that searches, evaluates, and tailors internship applications using LangGraph.
- Implemented job-description embeddings with pgvector, JWT authentication, Redis rate limiting, and Dockerized services.
- Engineered a database-enforced approval workflow preventing applications from being sent without explicit user approval.

CERTIFICATIONS

OOPS and DSA | CipherSchools Jul 2026

- Certificate

Django, HTML and Web Development | Udemy Sep 2026

- Certificate

Agentic AI | Oracle Sep 2026

- Certificate

ACHIEVEMENTS

- Solved 100+ problems on LeetCode and earned multiple Python badges on HackerRank.
- Maintain public GitHub repositories showcasing full-stack and AI engineering projects.
